

**WAR-EMD-232D**  
**WAR-S10-232**

## Desktop Readers

WAR Desktop Reader Series allows the WatchNET Access Control System to enroll cards with the use of a reader connected to the server using an RS232 Interface. This eliminates the use of manual entry of the card numbers. Card can be scanned and issued to the card holder when registration takes place. Desktop Readers are available in either EM or Mifare card reader formats.
