

## B-4S

### GATE MAGNETIC DETECTOR (METAL HOUSING)

Magnetic detectors are basic elements of a perimeter protection system. Small **B-4S** tight side magnetic detectors in a metal housing are designed for surface mounting. The metal screen protects the wiring against damage, which makes these detectors a perfect solution for locations particularly vulnerable to sabotage attempts or mechanical exposure. These detectors are screwed to a surface and provide an ideal solution for garage gate installation.

- surface mounted (screw mount)
- rugged, metal sealed body
- armored cable

### TECHNICAL DATA

Max. reed switched voltage	100 V
Max. switched current	400 mA
Operating temperature range	-10...+55 °C
Weight	270 g
Maximum humidity	93±3%
Make distance	75 mm
Break distance	80 mm
Dimensions magnet enclosure	78,5 x 30 x 30 mm
Environmental class according to EN50130-5	II
Detector type (outside magnetic field)	NO
Reed switch enclosure dimensions	104,5 x 44,5 x 11,5 mm
