

SP-4001 R

OUTDOOR SIREN WITH OPTICAL AND ACOUSTICAL SIGNALING

SP-4001 R is an optical-acoustic siren designed for outdoor installation, provided with super bright LEDs and a piezoelectric transducer. It offers three types of 120 dB intensity modulated tones to choose from. Enclosure of the siren is made of polycarbonate, which ensures high mechanical strength and aesthetic appearance of the device that remains unchanged over time. A simple, yet attractive design of the enclosure makes it ideal even for a modern façade. The device is provided with tamper protection against opening or tearing off the wall, and the inner shield of galvanized sheet additionally protects the electronics board and transducer against mechanical damage. The electronic circuits are properly weatherproofed, so they are also resistant to the effects of harsh environmental conditions.

The SP-4001 optical-acoustic siren is available in three color versions: SP-4001 R (red), SP-4001 BL (blue) and SP-4001 O (orange).

- acoustical signaling: piezo transducer
- optical signaling: ultra bright LEDs
- inner metal shield
- tamper protection against opening and removing from mounting surface
- available also in blue (SP-4001 BL) and orange (SP-4001 O)

TECHNICAL DATA

Environmental class	III
Enclosure dimensions	148 x 254 x 64 mm
Operating temperature range	-35...+55 °C
Nominal supply voltage (±15%)	12 V DC
Max. current consumption	270 mA
Weight	805 g
The intensity of sound	120 dB

The actual appearance of the products may differ from the presented images. Product descriptions are provided in the web service for information purposes only.
